PROFILE

I am an experienced frontend developer with a strong focus on React, boasting over 3 years of industry experience. My expertise lies in designing visually captivating and user-centric interfaces, collaborating seamlessly with cross-functional teams. By staying up-to-date with the latest frontend frameworks, libraries, and design trends, I ensure the delivery of modern and cutting-edge web applications. Eager to contribute my technical proficiency and passion for frontend development, I am now seeking impactful projects that embrace innovation

WORK EXPERIENCE

Frontend developer (freelancer)

Upwork

November 2022 - May 2023

- Translated wireframes into interactive and user-friendly web interfaces.
- Ensured that the websites are optimized for various devices and screen sizes.
- Gave frontend lessons to a client.
- Identified and resolved front-end issues on existing websites and applications.
- Improved website performance through code optimization and caching techniques.

Frontend mentor

Neizu Academy

May 2022 - September 2022

- Developed front-end web applications using HTML, CSS, Javascript, and React.
- Redesigned and expanded currently active websites.
- CSS and Javascript code minification training.
- Instruction of lessons that follow the curriculum.
- Worked to improve application performance and solve problems.

Frontend developer

Neuroleap Corp

January 2020 - March 2022

- Designed and built great responsive UIs that consume REST APIs.
- Transformed design prototypes into pixel-perfect applications with enhanced animations.
- Worked on bug fixing and improving application performance.
- Collaborated with cross-functional teams to accomplish the client's deadlines in an Agile environment.
- Optimized React components for performance and responsiveness to ensure smooth user experiences.
- Stay updated with new tools, frameworks and approaches.
- Developed and implemented new user-facing features and functionalities using React.js and related libraries.
